

Construction Equipment & Parts GmbH

An Insight into your International Foundation Equipment Partner

Australasia - S.E. Asia - Asia - Middle East
Africa - Europe - Russia - Canada - Americas

Introduction

In 2005, Construction Equipment & Parts GmbH was incorporated by Mr. Ian Carton, with a vision to fill a niche in the foundation equipment market.

As a time served mechanical engineer with 25yrs experience in the foundation industry, Mr. Ian Carton has alot to offer the Industry.

Starting his career with Pigott Foundations / Bachy UK, he went on to spend many successful years with Bauer (Equipment & Construction Divisions) working throughout the world on some of the most extreme jobsites and and high level workshops.

Welcome from Mr. Ian Carton - Managing Director

It's my pleasure to welcome you to Construction Equipment & Part GmbH. There are many individuals & companies offering pure sales of foundation equipment & associated plant, but few who can offer the complete service and even less who can actually achieve it.

We specialize in difficult jobsite conditions and in particular the specialized equipment that is associated with it.

Deep piles and diaphragm walls are our forte.

From 2005, a dedicated team of highly experienced individuals have been brought together to ensure that we can deliver to the highest standard anywhere in the world.

We pride ourselves on working very closely with our clients on a one to one basis, therefore providing the high level of service neccessary to stay at the forefront of the industry.

With the vast knowledge and experience gained over the years specializing in supporting all aspects related to foundation equipment & plant, we have specifically decided to focus on key areas in order to provide the industry with alternative avenue for solutions to existing and new scenarios.

We can assist with jobsite equipment planning, supplying new and used equipment, spare part & consumables, co-ordinated site installations, commissioning of equipment & plant amongst others.

Our services are used on a regular basis, by leading foundation equipment manufacturers and contractors worldwide.

We are based in Dubai, UAE, so to be centrally located. From here we can comfortably service from east to west.

Our workshop is set up to cover and handle specialist repairs of foundation equipment, in paticular diaphragm wall trench cutters.

In order for us to provide the highest level of service efficiently, we have 4 main divisions:

Equipment & Parts Division

We manufacture & supply many types of foundation equipment, accessories, spare and wear parts.

www.cep-equipment.com

Trench Cutter / Diaphragm Wall Division

New & used equipment.

We manufacture & supply spare and wear parts.

Both workshop & on-site services.

www.trenchcutter.com

Ground Improvement Division

We design, manufacture and supply Deep Vibroflots.

Ground compaction, stone columns, concrete columns.

Equipment & Parts Division

With regard to our manufacturing department, we follow the very strict standards already set by leading foundation equipment manufacturers. This ensures we do not compromise on steel quality and specs to stay in front and be competitive.

Part for part, we can guarantee lower prices and faster delivery times than our major competitors. Our products are of at least equal standard. We keep our overheads to a minimum to achieve the best results for our customers.

Key Area's

1. New and used foundation equipment – Trench Cutters, Drilling Rigs, Cranes, Diaphragm wall equipment.
2. Mechanical grabs.
3. Drilling Tools i.e augers, buckets, core barrels, chisels etc.
4. Kelly bars.
5. Double wall casing, drive adaptors.
6. Complete desander systems up to 500m³ capacity.
7. Decanter / centrifuge and slurry / mud treatment plants.
8. Foundation drilling teeth, wear parts / consumable.
9. Bentonite / slurry pumps and spare parts.
10. Grout stations and mixers, hose pumps etc.
11. Water pumps - suction (De-watering) and high pressure for Vibroflots.
12. Mining tools and bits.
13. Road milling tools and bits.
14. Tunnelling tools and bits.
15. DTH bits.
16. TBM tools and bits.
15. Wear parts for road, tunnelling and mining equipment.

Diaphragm Wall / Trench Cutter Division

Diaphragm Wall equipment is an area where we really stand out. With years of experience commissioning, overhauling and providing customer support for Bauer on a worldwide scale, we are in a unique position to offer best alternative service available, to support your current and future needs.

Apart from continuously having used Trench Cutters and all the associated equipment available for re-sale, we also manufacture and supply all the necessary spare and wear parts to back up and support your operations. In-house, we manufacture cutter wheels - both standard and full face versions, suction boxes, frame and steering flap extensions, etc. The quality is guaranteed to be equal to OEM.

We cater for Bauer, Casagrande and Soilmec.

Our workshop in Dubai also offers and undertakes the complete repair, overhaul and routine servicing of gearboxes, mud pumps etc. Our technicians are factory trained to carry out the works as per the manufacturers directives.

Low head-room / very deep excavations? Want to build your own Trench Cutter? No problem, we have technology and know-how. With our dedicated engineers, coupled with our in-house design team we can adapt any existing set-up or start from scratch.

We constantly have many spare & wear parts readily available, like:

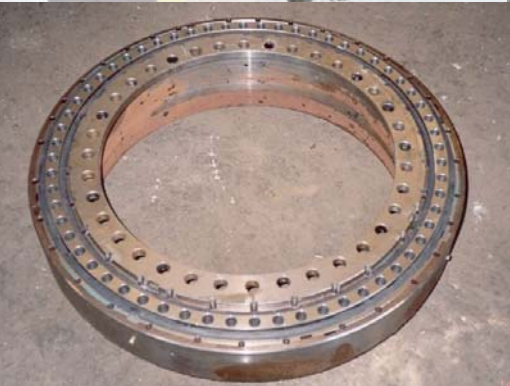

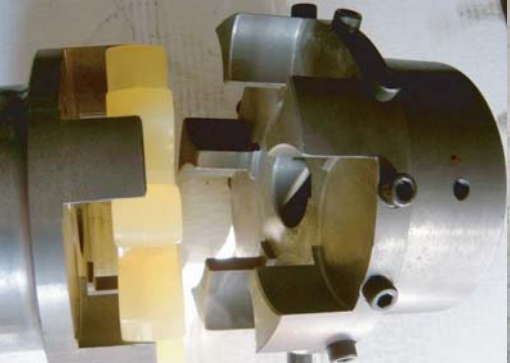

1. Cutter wheels, suction boxes, frame & steering flap extension kits.
2. Gearboxes and all the spare parts.
3. Gearbox dampers.
4. Mud pumps and all the spare / wear parts.
5. Mud Hose for HTS, HDS HSS systems.
6. Trench cutter teeth, tooth holders, flap teeth.
7. Hydraulic pumps and motors.
8. Cutter frames and much more.....

All new parts are supplied with 6 mths warranty against manufacturing defects.

All used Trench Cutters sold, are fully commissioned on our clients jobsites by our technicians as standard practice. We pride ourselves on making sure that our clients are totally satisfied and the equipment goes to work as normal. We always go that extra mile, as we consider it is just as important as the initial sale itself.

Aftersales - we are available 24/7, so we're only a phone call away.

Consultancy work also undertaken for diaphragm wall projects.

From here, we solely concentrate on supporting the ground improvement sector. There is an ever growing market due to the sheer amount of land being reclaimed worldwide and the need to treat it cost effectively before additional construction takes place. In addition, stone columns are an excellent alternative to traditional piling, due to the speed and relatively low construction costs involved.

Our complete range of Vibroflots are designed and constructed in modular form. They all use common eccentric assemblies and are unique in the fact that the design gives the end user, the luxury to be able to simply change the prime mover from electric to hydraulic or vice versa, very easily. Apart from initially saving huge investment costs, it puts the end user in a perfect position to offer solutions to cover any jobsite condition or requirement. Used as an attachment, they can be mounted on to the mast or leader of any suitable piling rig and when incorporating an existing pull down / crowd winch, a complete and effective bottom feed system is obtained with minimum outlay. In addition our range can be simply suspended from a crane or even mounted onto a suitable excavator. For compaction, they can be used as a single unit or as a tandem.

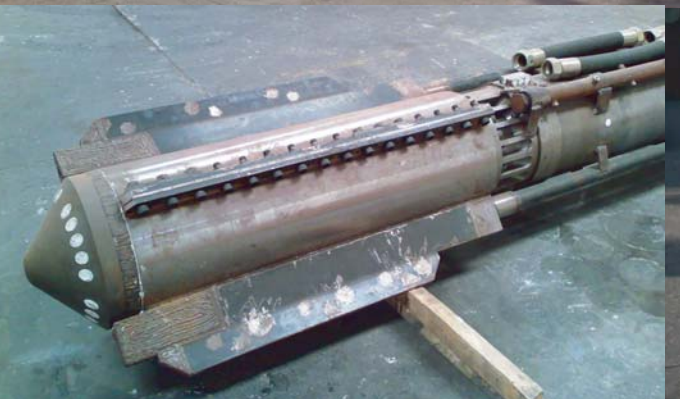

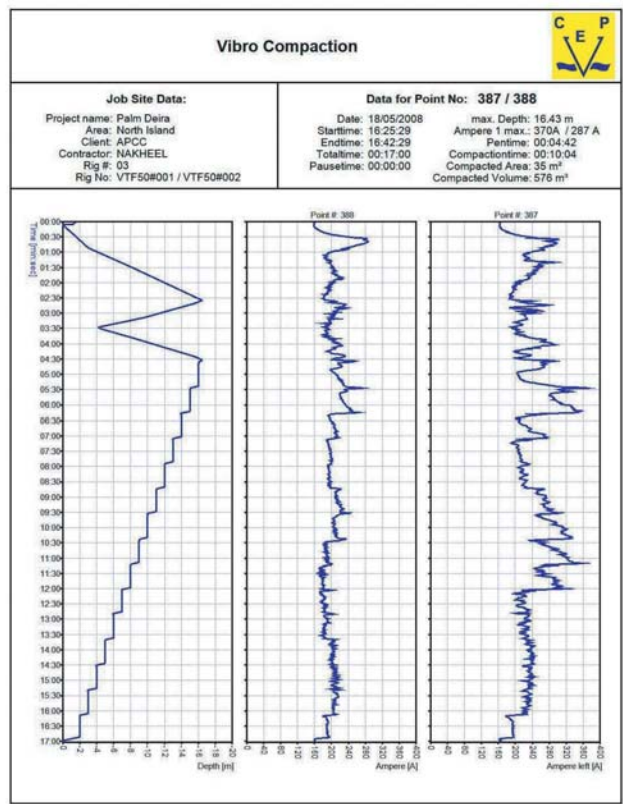

Our hydraulic range of Vibroflots are designed to simply couple up to power packs that are in common usage throughout the foundation industry. Many companies are already using top vibrators, like the ICE 815C for example, for driving casings. So with a small adaptation, the same power pack can be used with our Vibroflots, thus making the operation very cost effective. At the end of 2009 we joined forces with the Dieseko Group of Holland, better known for their ICE & PVE Vibro Hammers. Combining their vast knowledge and experience with vibratory equipment, their worldwide network of 60+ agents and dealers and our co-operation, we are strategically placed at the front of a fast growing market to service our clients to the very highest levels.

From Australasia & the Far East, across Asia into the Middle East, Europe the America's, with our technology and service we can supply 2nd to none Vibroflot Equipment. Catering for:

- Large & Small Scale Vibro Compaction.
- Vibro Replacement Concrete Columns.
- Vibro Replacement Stone Columns (Top and Bottom Feed).

Service Division

Comprehensive supplier of specialist services for the foundation industry.

We specialize in supporting all aspects of plant & equipment, both on jobsites and in workshops.

Specialist Mechanics

When the need arises to bring in specialist backup, either in the workshop or on the jobsite, we offer the complete solution.

From comprehensive inspections to the final repair, it's covered. Complete overhauls or breakdown coverage for all foundation related equipment.

All aspects are covered including covering and assisting with warranty claims.

We have a workshop in Dubai that can be used to assist in the repairs of specialist equipment.

Specialist Operators

All of which are professionally trained and have years of experience working around the world.

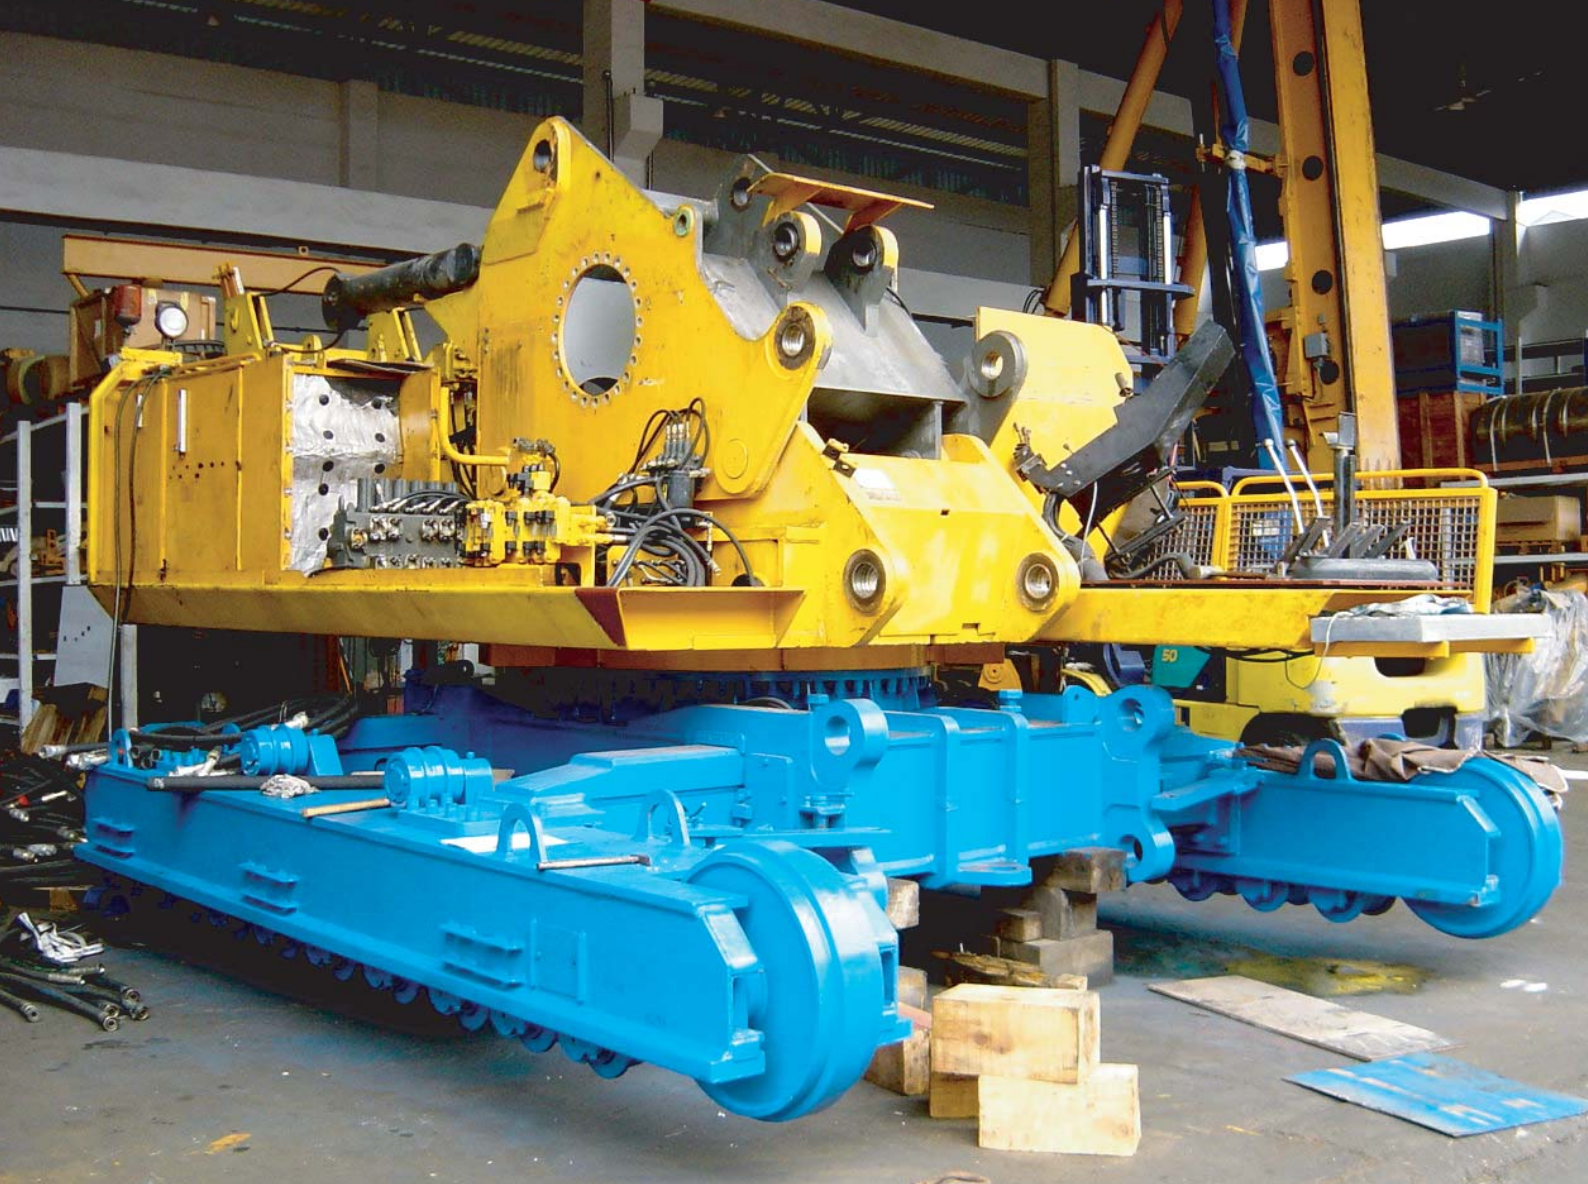

From bored piling to diaphragm walls.

Our guys don't just operate the equipment, they go one step further and take care of the day to day maintenance as well – a fully comprehensive service for the client.

They are used to working in the most extreme and remote conditions, from the 3 Gorges Dam in China to Dhaliganga Dam in the Himalayas, India. From Las Vegas, USA to Singapore. In actual fact we have worked on all the continents and have the experience to cope and fulfil our duties anywhere.

We can also assist to find solutions to various difficult jobsite situations, whether its regarding the depth, extreme ground conditions, bentonite difficulties, whatever it is we can cope.
